EMAS Junior Mentorship Program

Dear Dr. ,

Following the success in previous years, EMAS is delighted to announce the third round of the Junior Mentorship Program (JuMP) for the period 2019 - 2021. The main aim of JuMP is to encourage career development of junior clinicians and researchers in the field of post-reproductive health. One expert mentor will be paired with a mentee for 18 months, based on mutual research interests.

The role of the mentor is to provide guidance on how to write a protocol and abstract, how to present at conferences and how to write a paper as well as clinical case solving. The outcomes are a research project, disseminated as a poster or oral presentation at the 2021 EMAS congress, and submission of a research paper to a peer-reviewed journal. As mentor-mentee pairs may not come from the same country, communication will be preferably online (e-mail, Skype, etc) and in English.

You can apply if you are:

- Below the age of 35 years or still in training
- A paid-up EMAS member
- Interested in research in the field of post-reproductive health
- Keen to liaison with and learn from a scientific expert with international reputation

Mentees of the period 2017 - 2019, who want to extend the collaboration with their mentor, have to reapply. If you are not an EMAS member, join and be eligible to be a mentee. Annual membership fee is only 25 euros for junior members (< 35) and doctors in training.

The deadline for mentee applications is Monday, October 28th 2019. The application form is available on the EMAS website:

https://www.emas-online.org/juniorsection/
Following evaluation by the JuMP committee, selected mentees will be paired with mentors. JuMP is planned to start on Monday, November 18th 2019.

We hope you will take the opportunity to participate in this exciting initiative.
